

## STAY SAFE WITH OUR COVID-19 SANITIZATION PROGRAM

## COVID-19 EMPLOYEE & VISITOR PRECAUTIONS

The health and safety of our employees and for visitors to our facility is paramount and we have outlined some of the precautions installed across the business to ensure we create a safe working environment for our employees and visitors at all times:

- › Infrared temperature checking at all facility entrances to all employees & visitors, if temperature exceeds 37.4°C, the employee or visitor is not be permitted to enter
- › Upon entering the facility all employees & visitors are directed to our Dubai Health Authority approved Sanitization Tunnel before accessing the workshop or offices
- › A touchless security system has been installed at all office entrances and only permits entry to approved employees
- › Visitors are permitted via appointment only and strict entry guidelines include N95 face mask, gloves, temperature check, sanitation tunnel processing and interaction with scheduled meeting personnel only
- › All incoming deliveries are sanitized prior to entering our stores and offices
- › Social distancing, face masks, closed office door policy, knock before entry to offices, kitchen & pantry closure and cordoned off closed seating areas etc. are implemented through-out all our facilities and strictly adhered by all staff
- › All employees are not permitted to utilize public transport and company transportation has been implemented to accommodate all employees

**STAY SAFE, AVOID INJURY & SAVE MONEY!**

## COVID-19 PREVENTION MEASURES YOUR SAFETY IS OUR PRIORITY

### COVID-19 EQUIPMENT SANITIZATION & PRECAUTIONS

All off hired equipment returning from customers and all new equipment being delivered to customers, complete a comprehensive sanitization procedure prior to entry and departure from our facility. This includes:

- › Extreme high-pressure (3000PSI) and high temperature (90°C) with sanitation cleaner inserted is utilized to methodically clean all equipment entering and departing our facility
- › All common touch areas on equipment, including control panels, ignition, entry points, door handles, fluid check areas and handrails etc. are manually sprayed with sanitizer and wiped down, upon entry and departure
- › All closed cabin machinery has an additional sanitation process, including a comprehensive wipe down of all air conditioning vents, machine controls, steering wheels, handles, operators chair and cabin windows & doors
- › All our delivery drivers complete a final additional sanitation of controls after delivery and after final loading where customer collection is involved
- › Our service and 24/7 support teams that routinely visit sites for service & maintenance or for breakdown and operator errors with equipment, are all equipped with sanitation products and correct PPE, and they strictly follow our before & after sanitation procedures when entering and exiting sites

**STAY SAFE, AVOID INJURY & SAVE MONEY!**
